Description of fiscal impact:

This bill may have long term negative fiscal impact to the Department of Corrections.

FISCAL ANALYSIS

Assumptions:

1. This bill would double the penalty for teachers who commit certain sexual offenses against minors.
2. Since 1999, two teachers have been convicted of sexual assault against a minor.
3. The average sentence length for those two offenders was two and a half years.
4. Because there have only been two convictions in the past ten years, the department is not able to determine how many offenders will be affected by this bill, what crimes they will be sentenced for, or if a harsher penalty would already apply under current law.
5. Because this bill would require a judge to impose twice the term of imprisonment if the offender was a teacher, offenders convicted under this bill could add long term fiscal impact to the Department of Corrections. Current costs are \$33,569 per male offender per year and \$44,348 per female offender per year.
